Overview :

Eggs can Fly is offered as an on-site activity. The guests must make a vessel to protect their egg from being dropped from height. The ratio for this activity is 1:24.

STEP ONE	STEP TWO	STEP THREE	STEP FOUR	STEP FIVE
List significant hazards here:	List groups of people who are at risk from the hazards you have identified:	List the Control Measures for the identified risks:	Identify any residual risk remaining after the control measures have been put in place:	Identify any benefits that may result from exposure to the perceived and residual risk for participants:
Slips, trips & falls	Instructors Guests	Safe Working practice Session guide Group leader responsibilities Equipment safety checks In house training Emergency procedures First aider always present First aid & near miss forms NOP's	Individuals may not follow safety briefing.	Communication skills potentially improved
Effect of weather	Instructors Guests		Weather-wind and/or rain or excessive heat.	Exposure to both hot and inclement weather has proven positive developmental effects and teaches people about their limitations.
Going past boundaries.	Instructors Guests	Course of the eggs been dropped does not enter activity areas or pass beneath the Zip-wire.	The clients can usually be seen all the time from a suitable location outside the activities area.	The clients have sense of freedom from the instructor while carrying out the task set, as well as knowing they can still see the instructor and ask for help if needed.
Falling Object	Instructors Guests		Individuals may not follow safety briefing.	

Allergies to eggs	Instructors Guests	Check for allergies, if allergic keep them away from eggs/ use water balloons instead of eggs	Someone unknowing touching the egg	
Cut or stabbed by Scissors	Instructors Guests	How to use scissors safely prior to use. They are rounded and child friendly	Individuals may not follow safety briefing.
