**Overview:** Power Fan Jump was purpose built by JM Adventures (approved contractor) December 2019. The Power Fan Jump is 13-meter jump and is suitable for participants between 20kg and 120kg. Trained staff do a check at the beginning of the day, when used, to ensure all equipment and elements are in good working order. There is annual independent inspection by High Times Ltd. The power fan unit will be sent off, to the manufacturer for full service, every two years or 250,000 jumps whichever occurs first. A quarterly inspection of the structure is carried out by trained staff and recorded. All the equipment inspection procedures are established and overseen by the Chief instructor who has the Winter Mountaineering and Climbing Instructor (WMCI). Staff are inhouse trained and assessed. Preferred Staff to Client ratio 1:12 and a maximum of 1:16 under supervision (under instruction 1:1 instructor to client for doing the Power Fan).

Hazards	Groups of People at Risk from the Hazards Identified	Probability Severity Risk Category	Control Measures – Reduces the severity and lowers the probability to acceptable levels	
Structural Failure	Instructors, staff and guest/participants	Very unlikely	Power Fan Jump structure was built by approved contractors and external annual inspections are carried out. Quarterly structural checks are done and	
		Fatal	any issues reported to senior staff immediately and action taken as necessing	
		Medium		
Falling objects	guest/participants  Major  or maintenance is being done and guests briefed on how to fall to protect themselves and guests advised to remove thing	Helmets are worn by anyone in the area when activities are being delivered		
		Major	or maintenance is being done and guests briefed on how to stand if object fall to protect themselves and guests advised to remove things from pockets	
		Medium	have them stored safely in zipped pockets. Emergency procedures are in place in case of an accident.	
Unauthorized access to the Power fan	Instructors, staff, guest/participants	Unlikely	When not being used on session the staples are removed and stored in safe locked place. Also, the belay drope is clipped into a tracer line that is then cli above the removable staples preventing access. When not in use at all staple sorted in a locked place and belay line on its tracer cord is clipped above	
Jump	and general public	Fatal		
		High	removeable stables.	
Slips, trips and falls	Instructors, staff and	Likely		
	guest/participants	Minor		

		Medium	Maintenance of site is done by the activities team and maintenance team.  Instructors visually check the area upon arrival. General brief and group management is provided by instructors to ensure activities are run safely.
Climbing up the structure/pole without being clipped into the belay line / Drope	Instructors, staff and guest/participants	Unlikely Fatal High	An instructor is present during the session and the instructor clips the participant into the belay line/drope and checks the harness and helmet before allowing the participant to climb up the pole to the jumping platform. When not in use staples are stored in a safe locked place preventing access.
Power Fan Unit jamming and/or locking up	Instructors, staff and guest/participants	Very Unlikely Major Medium	Daily inspection before use is done which is detailed in operating procedures.  Belay/drope is always used with an energy absorber to prevent shock loading of a participant if a jam were to occur.
Equipment failure / malfunction	Instructors, staff and guest/participants	Unlikely Major Medium	Only participant's weight over 20kg and under 120kg can do the jump. PPE and other equipment visually check before use and a further monthly check takes place and is recorded to ensure equipment is in good working order. Any suspect equipment is immediately taken out of use and replaced and reported to senior staff. Daily inspections for the Powerfan unit are carried out which are detailed in operating procedures. The Drope / belay line is to never be knotted.
Physiological effects	Guest/participants	Unlikely  Major  Medium	Instructors are aware of the group's needs and medical issues. Challenge by choice brief is given and instructors will respect participants choices and be sensitive and adapt to their reactions to the activity they are invited to participate in.
Stress / Panic Attack	Guest/participants	Likely  Major / trauma  High	Challenge by choice brief is given and instructors will respect participates choices. Instructors will air on the side of caution if participants start to panic or have strong emotional reaction to the activity the instructors will react quickly to ensure the level of stress is brought back down to acceptable level. This should help ensure the activity runs well for all those involved.
Medical issues – pregnancy, heart complaint, spinal injury or weak spine or medical conditions that could be exacerbated by the jump.	Instructors, staff and guest/participants	Likely  Major  High	Instructors' brief participants making them aware that no one should be jumping if have any issues that could be exacerbated by the jump.
Frozen/stuck participant	Guest/participants	Likely Major High	Instructors are trained in rescue procedures and will look to build up participants by using a variety of techniques including: shorter jumps, coming along side and offering reassurance, getting participant to down climb, etc.

Landing wrong when reaching the ground on the jump	Instructors, staff and guest/participants	Likely	Instructor to give a clear brief on how to land (feet together and bend legs). There are crash mates that are positioned to help provide a safe landing.	
		Minor	There are drash mates that are positioned to help provide a safe fanding.	
		Medium		
Swinging back into the pole	Instructors, staff and guest/participants	Unlikely	Instructors to brief on how to jump off from the platform – stepping off and not jumping. When winds reach 35/40mph or stronger the session will stop	
		Major	till wind dies down or session cancelled. Helmets are worn by participants and	
		Medium	checked before setting off up the pole.	
Loose clothing	Instructors, staff and	Unlikely	Instructors to ensure loose clothing is removed/zipped up before participants	
getting caught on	guest/participants	Minor	are sent off to climb and jump.
