Overview: Wheelchair abseil sessions are carried out on purpose-built tower that has wheelchair access to the top and bottom. A Winter Mountaineering and Climbing Instructor (WMCI) qualified Chief Instructor has overall responsibility. All other instructors are RCI or CWI qualified, or in-house trained using NGB recognised techniques. An in-house examination is completed on each staff member by the Technical Advisor to sign of general competency in roped activities and further specific training is given for delivery of Wheelchair abseiling sessions. This process is periodically checked and validated by the independent Technical Advisor. Preferred Staff to client ratio are a minimum of 2 instructors for the group (any size) for the wheelchair abseil. All appropriate personal protective equipment is worn during sessions

Hazards	Groups of People at Risk from the Hazards Identified	Probability Severity Risk Category	Control Measures – Reduces the severity and lowers the probability to acceptable levels
Structural Failure	Instructors, staff and	Very unlikely	Ab Slab was built by the maintenance team of that time (2013) and signed off

		Medium	anchors before barriers are taken down for the abseil. Guests are told or helped to put breaks on at the bottom of the tower to avoid rolling off after finishing the decent.
Tipping over backwards in the chair whilst being lowered down the ramp	Participants	Unlikely Fatal High	The ropes are carefully tied onto the chair to ensure it can't tip backwards. An instructor abseils down behind the guest and can arrest any potential issues as required. Also, a specific chair has been purchased and used and is designed so to prevent it tipping over backwards.
Fingers caught in equipment (wheels or other metal work)	Participants	Unlikely Major Medium	Participants are properly briefed on their role during the descent. An instructor abseils down beside the guest to ensure no equipment is near the participant's hands.
Rope Burn	Participants, instructors and carers	Very Unlikely Minor Low	All ropes are safely controlled. Participants and carers are properly briefed on the lowering procedure and understand what ropes will be moving and where to safely observe.
Environmental Hazards	Instructors, staff and guest/participants	Very likely Fatal	All participants are briefed on proper clothing for the current weather conditions. Instructors are issues appropriate PPE waterproof jacket, warm layers, and gloves to use for activity delivery. Towers not used or sessions cancelled in the event of thunder & lightning (activities can resume 30mins after last thunder sound was heard) and/or winds gusts above 40/45mph (senior staff may reassess and end sessions below this level or may let continue if direction is suitable and hazards are
		Medium	managed). Also, further control measures under the Adverse Weather Risk Assessment are to help with environmental hazards.)
Slips, trips and falls	Instructors, staff and guest/participants	Likely Minor	Maintenance of site is done by the activities team and maintenance team. Instructors visually check the area upon arrival. General brief and group management is provided by instructors to ensure activities are run safely.

		Medium	
Equipment / rope system failure	Participants and instructors	Unlikely	All equipment is inspected monthly. To run these sessions staff are train set up and delivery and work along more senior staff.
